

HOW DO I GET STARTED?

1

DECIDE ON THE IMAGE AND WALL DESIGN

Get rights to the image, make design decisions on your wall, and decide if the image will be back-lit or front lit.

2

PREP AND CROP

Review the file and image requirements below and prepare the digital file.

3

SHARE WITH AMICO

Send the image file and project drawings to: AMICOARCH@amicoglobal.com

FILE & IMAGE REQUIREMENTS

File Types:

A raster (pixel based) image is required; .tif, .psd, .bmp, .gif, .jpg, and .png are all acceptable file formats.

Image Cropping:

To ensure your image is translated to your exact design needs, we ask that you crop and provide an image in the identical aspect ratio of your design. For instance, if your wall is 120"x96" ($120/96 = 5/4$) the aspect ratio of the digital image you provide should be 5:4.

Background:

If possible, background noise and imagery should be removed, this will help the subject imagery to stand out.

Image Resolution:

The resolution of your image will ultimately dictate the amount of detail that can be captured with our Picture PERFECT process, so having the highest possible resolution is helpful in the process.

Including Text:

Text should always be as big and bold as possible to ensure proper visual translation into perforation. Text that is too small may not be legible.

Image Rights:

AMICO expects and assumes that the designer owns all necessary rights to use of an image.

Do you need assistance manipulating your image file? No problem, reach out to amicoarch@amicoglobal.com

QUESTIONS TO ASK YOURSELF DURING THE DESIGN PROCESSES

- ▶ Where is the installation?
- ▶ What are the environmental conditions?
- ▶ How is the installation area used?
- ▶ What is the goal of the installation?
- ▶ How close can viewers get to the installation?
- ▶ What material and finish is appropriate?
- ▶ How will this install be lit?
- ▶ What sub-structure will the mural attach to?
- ▶ What is the light to dark ratio of the image?
- ▶ What is behind the image wall?

WHAT IS A PICTURE PERFECT WALL?

A formed metal wall that uses photographs and graphics translated into perforated holes to reproduce the image in durable metal materials.

WHERE CAN I INSTALL A PICTURE PERFECT IMAGE WALL?

These types of walls can be installed indoors or outdoors. Typical uses include facades, screens, feature walls, signage, exhibit installations, sunshades, and interior wall ornamentation.

WHY USE PICTURE PERFECT PANELS?

This is a simple way to make a big impact on a project by creating a one-of-a-kind design element. Whether you are trying to create a focal point, or nice simple texture to bring interest to an environment. Picture PERFECT panels can provide distinctive design results.

WHAT KIND OF IMAGE CAN I TURN INTO AN IMAGE WALL?

Any image that you own the rights to can be converted in a beautiful metal installation as long as sufficient contrast and good imagery conditions exist. This could be an abstract design or texture or an objective image like a portrait.

WHAT ARE MY FINISH OPTIONS?

Typical finishes include powder coating, fluoropolymer paint, or anodizing. Likewise natural finish materials are also well within our capabilities; however the design and the image must tolerate the natural and organic aging process of these types of materials.
