Continuous Insulated Stucco Lathing Accessories

SCOPE
This submittal covers the use of a new (metal or vinyl) component that permits the application of hard-coat stucco or thin-veneer stone over rigid insulation that is attached to the outside of the building envelope, where the design is seeking to comply with the 2012 International Energy Conservation Code.

AMICO’s C-I Weep Trac™ System includes a conventional corner bead (X-1, or wire corner) that facilitates the return of stucco back into the openings on the wall, including doors, windows, jambs, soffits, etc. Additionally, the C-I Weep Trac™ is an effective Foundation Weep Screed as the base of the wall, meeting International Building Code (IBC-Chapter 25) requirements.

MATERIALS
ZINC ALLOY or PVC or Galvanized Steel

THICKNESS OF BASE MATERIALS
Minimum thicknesses meet both ASTM C-1063, Table 1
ZINC ALLOY: 0.020”
PVC: 0.050”
GALVANIZED STEEL 0.0172”

FINISHES PROVIDED
ZINC - Mill finish
PVC - Mill finish
Galvanized steel with G60 coating per ASTM A653

AMICO RECOMMENDS THE USE OF ACCESSORIES MADE FROM ZINC ALLOY or PVC MATERIALS FOR ALL EXTERIOR APPLICATIONS AS DEFINED IN ASTM C1063.

PACKAGING AND PACKAGE MARKING
Available in 8-ft and 10-ft long lengths. Longest possible lengths shall always be installed to avoid joints. Each factory box shall be marked with manufacturer’s name, and style of accessory and country of origin.

CERTIFICATION
When required a certification that products meets the requirements of ASTM C1063 and ASTM C653 shall be provided.

MEETS THE FOLLOWING SPECIFICATIONS
ZINC ALLOY
ASTM B69 Standard Specification for Rolled Zinc

GALVANIZED STEEL
ASTM A653 - Standard Specification for Steel Sheet, Zinc-Coated (Galvanized)

PVC
ASTM D4216 Standard Specification for Rigid Poly (Vinyl Chloride) (PVC) and Related PVC and Chlorinated Poly(Vinyl Chloride) (CPVC) Building Products Compounds

REFERENCES
Meets IBC 2510 and IBC 2511
ASTM C847 Standard Specification for Expanded Metal Lath
Refer to ASTM C1063 for support spacing, lath selection, fastener selection and further information regarding the proper installation of metal lath and accessories. Meets Buy American Procurement Requirements. Made in the United States of America

LEED
both pre and post industrial recyclable content are available – contact the manufacturer.
LEED documentation requested from our website at www.amico-lath.com

C-I Weep Trac™
Galvanized Steel Accessory

FOR CONTINUOUSLY INSULATED STUCCO INSTALLATIONS
The 3½” nailing flange serves as a flashing when water resistant breathable building paper or paper backed lath is installed over the flange. The holes in the “trough” offer minor moisture weeping capabilities; over window and door heads, base of walls or other conditions that require drainage.

DESCRIPTION
This screed is installed at the base of walls as part of a drainage system for Continuous Insulated stucco or stone applications.

MATERIALS
G60 Galvanized Steel to ASTM A653 with a minimum thickness (0.0172 inch) prior to galvanizing to meet or exceed ASTM C1063.

AMICO RECOMMENDS THE USE OF ACCESSORIES MADE FROM ZINC ALLOY or PVC MATERIALS FOR ALL EXTERIOR APPLICATIONS.

REFERENCES
Meets IBC 2510 and IBC 2511 (for Weep Screed)
Refer to ASTM C1063 for support spacing, lath selection, fastener selection and further information regarding the proper installation of metal lath and accessories. Meets Buy American Procurement Requirements. Made in the United States of America.
