

HYDRODRY AMIFLOW DRIP EDGE

FOR STUCCO AND PLASTER INSTALLATIONS

AMIFLOW Drip Edge is a vinyl HI-PERFORMANCE trim profiles provide a straight, true, continuous surface that will drain and ventilate the wall cavity above windows, doors and garage doors. It can also be used in conjunction with the E-Z Vent for a 2 piece Mid-Wall installation. The High Performance trims integrate many features to simplify installation providing guides to help installers maintain the proper stucco thickness. The key feature is the vented moisture trough which allows rain screen to be inserted to maintain the drainage cavity throughout the wall.

All butt joints, intersections, and ends should be joined, embedded and sealed in a quality sealant compatible with exterior paint finish.

This bead is required by most building codes in the United States. Check with local building codes for the proper clearance for the weep screed placement above grade.
