HYDRODRY AMIFLOW UD

FOR STUCCO AND PLASTER INSTALLATIONS

AMIFLOW UD is a vinyl HI-PERFORMANCE trim profile that provides drainage for sill stones, roof pitches, and base of wall applications. The UD features drainage trough for proper Rain Screen Termination and an integrated ground for the proper stucco thickness. The key feature is the vented moisture trough which allows rain screen to be inserted to maintain the drain-age cavity throughout the wall.

All butt joints, intersections, and ends should be joined, embedded and sealed in a quality sealant compatible with exterior paint finish.

This bead is required by most building codes in the United States. Check with local building codes for the proper clearance for the weep screed placement above grade.
